FACE MASKS AND GLOVES

Due to the Covid-19 pandemic, face masks are in high demand.

Whilst there is no evidence to prove they prevent someone catching Covid-19 (or any airborne virus), they should be worn under the assumption wearers have the virus and therefore are reducing the risk of spreading the virus to others.

Protect your staff and customers, and reduce the spread with disposable face masks.

- Disposable face mask
- Non-latex ear loops for comfortable, hypoallergenic fit
- Made of 3-Ply non-woven polypropylene
- Secure and comfortable fit.
- Colours may vary

- 3M™ Aura Particulate Valved Respirator (60/CASE) FFP3 EN 149:2001+A1:2009 Classification
- 3M™ Cool Flow™: Effective removal of heat build up.
- The 3M™ Aura™ Disposable FFP3 Valved Respirator 1873V+ helps protect the wearer from airborne hazardous contaminants by filtering particles from the inhaled air.

- 3M™ Splash Resistant Surgical Masks Type IIR under EN14683:2005 classification
- Tie-on fastening with a white polypropylene four layer construction.
- Comfortable and breathable

- High Filtration
- The KN95 Respirator Mask is a face mask that provides protection from chemicals, dust and particles
- The mask's 3D shape is designed according to the ergonomics of your face to ensure a secure fit and increase breathing capability of the mask.

- Packs of 100
- Powder Free
- Latex gloves, manufactured to 1.5 AQL standards.
- S/M/L/XL sizes
- Colours may vary subject to stock

HYGIENIC DOOR SOLUTIONS

High traffic workplace doors are high risk for housing bacteria and viruses.

Don't compromise on door hygiene with our Antibacterial door plates, handle covers, and gel dispensing door handles.

**GEL DISPENSING
DOOR HANDLE**

Releases sanitising gel onto the user's hand as they pull open the door. Perfect for use in high risk areas where it's important to get users to sanitise their hands.

**ANTIBACTERIAL
PUSH PLATE**

An antibacterial door push plate that kills 99.9% of bacteria using silver ion technology to ensure the plate is clean to touch. Simple to fit and remove without any tools.

**ANTIBACTERIAL
DOOR HANDLE COVER**

**ANTIBACTERIAL
DOOR HANDLE COVER**

Antibacterial door handle covers that kills 99.9% of bacteria using silver ion technology to ensure the handle is clean to touch. Simple to fit and remove from most lever door handles without any tools.

**E-Coli
Salmonella
Streptococcus
Staphylococcus Aureus
Campylobacter**

SIGNAGE

SOCIAL DISTANCING

Due to the Covid-19 pandemic, social distancing is not only a requirement but a necessity in all workplaces.

Protect your staff and customers, and prepare your workplace for correct social distancing. We supply clear, branded signage, floor graphics and till-point sneeze guards.

SNEEZE GUARDS

FLOOR GRAPHICS

QUEUE & ENTRANCE SIGNAGE

BRANDED SIGNAGE

WE PROVIDE A WIDE RANGE OF BRANDED & BESPOKE SIGNAGE. CONTACT THE TEAM FOR MORE DETAILS TO DISCUSS YOUR REQUIREMENTS.

DECONTAMINATION AND DEEP CLEAN

Specially trained Covid-19 disinfection. The service allows businesses to continue operating with the minimum of disruption, or for a disinfection to be undertaken giving them and their employees peace of mind when returning to their normal place of work.

If required testing can be carried out via an independent supplier, swabs are taken and sent directly to the laboratory for processing. Sample processing results will normally be available in 4 days including transport.

DECONTAMINATION & DISINFECTION

Specially trained Covid-19 disinfection in 3 steps.

1. Treatment of all high traffic areas with a chemical solution approved by relevant government bodies.
2. Treatment to all flat surfaces again with approved chemical solutions.
3. Fogging of the entire area to ensure all surfaces are disinfected. An express 24 hours service is available if required.

FOG-IT'S THERMAL FOG

Our fog machine is suitable for home and vehicle.

Its unique form of sanitising and deodourising eliminates all germs, viruses and spores. It also removes foul smells such as tobacco, smoke, food spills, urine, mould and mildew and pet smells.

The cost effective process will sanitise and deoderise, leaving a long lasting freshness in a cleaner, safer environment.
